Summary

Hi, I've been through a lot, I mean... in general work experience, but my final stop and something I have fallen in love with, is programming and creating awesome web apps and systems. I was born in Sudan, grew up a refugee in Uganda and living as a refugee in Egypt. Being a refugee comes with lots of difficulties and barriers, that's why you will see sudden changes in careers and a gap in my profile. The result is a cocktail of diverse experiences that perfectly work together everytime.

Experience

Full Stack Web Developer | Back end developer | Django developer

Freelancer

Jun 2021 - Present (1 year 11 months)

Work in progress: <https://doctormina.pythonanywhere.com> . Designed and developed by me. A clinic management system. Fully customized dashboard using the power of the built-in django-admin.

Python for Data Science, AI & Development - IBM
CR6ZZ8AHDx2B

Skills

Django • Django REST Framework • PostgreSQL • React.js • Bootstrap • HTML • Cascading Style Sheets (CSS) • Problem Solving • ChatGPT

Honors & Awards

Employee of the year - Section F restaurants

Dec 2021

I was a Training manager / Quality Control Manager / Administrative assistant at Section F restaurants in Alexandria, Egypt.

I joined the company as a janitor/cleaner and became a Multi-department manager within 4 months. Enhanced training program, monitoring and quality control which led to efficient and high quality production to meet customer demand, something the company was struggling with. Collected customer feed back, resolved customer complaints which led to customer trust and hence retention.

Received a nice pen for the employee of the year.
